B

HOST AND ANIMAL BEHAVIOR TEAMS ARE CHARGED WITH THE CREATION OF NEW HOSTS AS WELL AS MAINTAINING AND IMPROVING THE COGNITIVE SYSTEM OF EXISTING ONES.

BEHAVIOR LABS

Behavior Labs are the site of initial programming for all hosts. Hosts assigned to the main lab floor will largely focus on honing the core of cognition – basic emotions, primary drives, analytical reasoning – for both new characters and repurposed hosts.

10 WESTWORLD CORPORATE GUIDEBOOK

DIAGNOSTICS

The Diagnostic portion of the Behavior Lab floor focuses primarily on pinpointing update needs for existing hosts, as well as administering quick debugging to malfunctioning hosts after patch releases.

If the problem cannot be solved through system troubleshooting, we will work with Quality Assurance to ensure the host to adhere to safety protocols, and Incident Manager to report any self-reported physical issues.
